

Chase Jamele

Assistant Project Manager

Chase was born and raised in the beach city of Redondo Beach. After graduating High School in 2014, he attended El Camino Community College and Santa Monica Community College from 2014 to 2016. In 2016 Chase moved to Antwerp, Belgium, to begin his studies in International Business Management. One of his most memorable moments was visiting Flanders Investment Trade which helps promote business and trade between Belgium and the rest of the world. After graduating in February 2020, he has returned to the Los Angeles area and begun his career working at Cayenne Wellness Center.

Dr. Carolyn Rowley gave Chase the opportunity to utilize his skills and simultaneously benefit those suffering from Sickle Cell Disease. Working with STAC is especially important to Chase because, at an early age, he learned that he was a trait carrier. During his younger years, he was an active athlete and sometimes would need to hydrate and take breaks. While he knew about the sickle cell trait, working on this Campaign and at Cayenne Wellness Center has broadened his understanding and has encouraged him to educate others about Hemoglobin S, its symptoms, and family planning.
